Abstract

Viral morphogenesis, production, release or
uncoating can be inhibited by effecting inhibition of
5 prenylation of, or inhibition of post-prenylation
reactions of, at least one viral protein. The use of
inhibitors of prenylation, and post-prenylation
reactions, for example, inhibitors of the mevalonate and
prenyl group synthesis pathways, inhibitors of prenyl
10 group transferases and mimics of the prenylation target
. CXXX box are disclosed.
